HUNTING AREA:

The hunting area of Schönfeld Hunting Safaris covers over 200,000 hectares of the best hunting territories of Namibia. Hunting is done in various parts of the country, depending on the trophy animals required by the clients. The area is covered partly by bushy savannah, camel thorn savannah, and partly by open flat areas with lime pans. The Kalahari-area consists of red flat sand dunes with wide open grass plains. During the rainy season from December till April it rains approx. 350 mm (14") p.a. In the other months we normally have dry, sunny and cloudless weather. The most agreeable temperatures are from March till October. From May to August it may be quite chilly in the early morning, with temperatures below freezing point possible before sunrise or after sunset. The hunting season is closed during December and January.
